

altis teknoloji

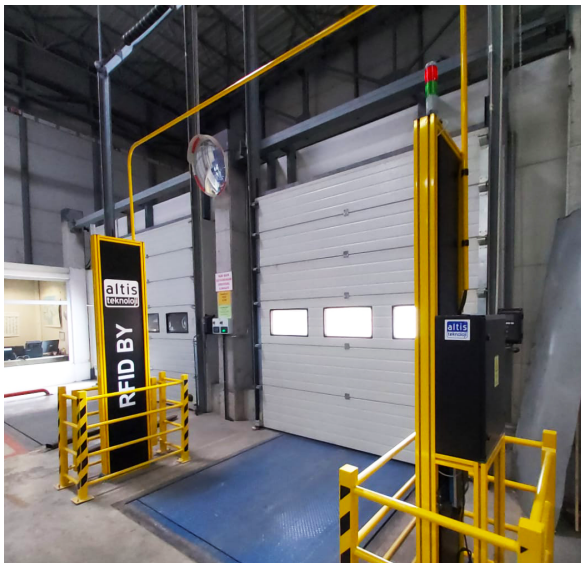

pursuing perfection with you

Our new product; Altis RFID dock and portal solution provides %99+ tag read performance without reading extraneous tags read outside the targeted zone.

Covers all tag orientations so all tags are read regardless their operation.

Direction detection feature provides %100 accurate direction determination of the tags. You don't have to worry about your forklifts maneuvers along the gates anymore!

Easy to install on the field. Easy to deploy and integrate with your software systems with sophisticated MQTT and REST API architecture.

Key Features

Key Competences

- Easy to deploy
- High reading performance
- Ultra narrow reading zone
- %100 direction and maneuvers detection
- Easy to integrate with software systems
- Works with any EPC Gen2+ RFID readers
- Adjust to fit virtually any entrance / exit point

Altis RFID Dock and Portal

Altis has ultra light and thin RFID Gates with high reading performance in world class is ideal for distribution centers, shipping and receiving doorways, wide exits and virtually any choke point. Inbound and outbound (pallet or item level) operations by forklifts and pallet jacks are easy as pie. Operators can ride hands free along the Altis RFID Dock and Portal Solution and whole movement through the warehouse between gates is stored in the WMS or ERP systems in real time via web services.

Additionally, Altis RFID Dock and Portal Solution does not determine the direction of RFID tags not only with algorithm but also sophisticated sensors and hardware. This makes our Altis RFID Dock and Portal Solution essential especially for two way gates!

Our RFID Gates Solution is the main component of Altis RTP Tracker Solution which is developed for Returnable Transport Packaging materials such as reusable plastic layer pads (PLPs), RTIs and KLTs. Click here for more information about Altis RTP Tracker Solution which is fully compatible with GRAI, GTIN and SSCC.

Proven by hundreds installations, Altis Teknoloji offers a new level of performance, ease of use, installation and easthetics to RFID portal users. Our new portal solution Provides controlled with a desired narrow Illumination path to approximately 100 degrees. It is ideal for any exit and entrance application since there may be hundreds of tags in close proximity which are not passing through.

Get To Know About Us

Altis is providing top national / multinational companies by designing, developing and implementing RFID projects includes both software and hardware. We have always challenged our accounts to build together for better, smarter, more optimized and sophisticated industrial solutions which are already core competencies of Altis itself.

We believe that effective communication is the key to project success. We listen to our clients whole heartedly and be sure fully comprehend their goals. Call us now and be sure that questions in your mind about RFID have already been solved here.
